

**NOTE**  
Woodland mostly comprises native species with a mix of faster growing 'nurse' species and slower growing 'core' species. Nurse species such as alder, birch and pine would grow quicker so that after 15 years they would be approximately 7-10m in height. They would provide shelter to bring on core species, such as oak and field maple. All disturbed hedgerows outside the substation platform area and access roads will be reinstated following construction.

- Legend**
- Electricity Transmission Buildings (indicative)
  - Site Boundary
  - SuDS Pond
  - Hedgerow Mitigation Planting
  - Woodland Mitigation Planting
  - Wet Meadow Seed Mix to SuDS Pond Planting
  - Meadow Wildflower Mix Planting
  - Landfall - Access Road
  - Temporary Access Road
  - Permanent Access Road
  - Proposed Haul Road
  - Route W Cable Corridor
